## About Me

Front-end developer looking for a job in Tokyo. Experienced with HTML, CSS, Javascript, as well as getting better with React, Typescript, Vue.js and React Native. Fell in love with front-end frameworks and wish to further my skills to become an achieved full-stack developer while being part of a strong team.

## Tech Skills

- HTML5 / CSS / SCSS / Bootstrap
- GitHub / Git
- Ruby / Ruby on Rails
- Javascript / React / React-Native
- SQL / AJAX / Stimulus
- Figma / Sketch

## Further Learning

- React
- Angular
- JavaScript
- Vue
- Svelte
- Typescript

## Education

### Lewagon Coding Bootcamp (2021)

Graduated from LeWagon coding course after looking to make a career switch to the tech industry.

### University of Hertfordshire (2014-2018)

Achieved a 1st class hon. in Media Production where I specialized in video editing and learned to use tools like Adobe Premiere, AVID, Final Cut X, Sony Vegas.

## Languages

English	Fluent
Portuguese	Fluent
Japanese	Conversational (JLPT N4)
Spanish	Conversational

## Experience

### Kammeko - Front-End Dev (2022 - present (internship))

Kammeko is a start-up company where I get to be part of the front-end team. In charge of implementing new components, writing tests, fixing bugs, developing new ideas while using Typescript/React.js.

### LeWagon Teacher Assistant (2022 - present (part-time))

After graduating from the LeWagon course, I was invited back to help out the new batch of students. This gave me a chance to keep learning through teaching.

### English Teacher (2019 - 2021)

Worked at two English schools, KidsDuo and Kogahkusha. My 1 year at KidsDuo involved managing classes of 30+ students at times and also became in charge of scheduling staff. At Kogahkusha (2yrs), was a more concise environment with classes of 4/5 students. I became in charge of giving private programming lessons to students using Sony's KOOV platform.

During my time teaching I gained many soft skills communication, organization, time management, planning, accountability and most importantly, patience when something goes wrong. I believe many, if not all of those skills are the backbone of a great programmer.

## Web Projects (more projects in portfolio)

### React CRUD Store

<https://renato-redux-store.netlify.app/>

An App created using React that follows the basic CRUD pattern, changing the state from API call. It allows you to create, read, update and delete products in your store. The user can also add and remove products to the cart. I still need to add a checkout feature, and implement Local Storage.
