About Me

Front-end developer looking for a job in Tokyo. Experienced with HTML, CSS, Javascript, and a number of other tools and technologies. Fell in love with front-end framework React/React native, and wish to further my skills to become an achieved full-stack developer while being part of a strong team.

Tech Skills

- HTML5 / CSS / SCSS / Bootstrap
- GitHub / Git
- Ruby / Ruby on Rails
- Javascript / React / React-Native
- SQL / AJAX / Stimulus
- Figma / Sketch

Further Learning

- React
- Angular
- JavaScript
- Vue
- Svelte
- Typescript

Education

Lewagon Coding Bootcamp (2021)
Graduated from LeWagon coding course after looking to make a career switch to the tech industry.

University of Hertfordshire (2014-2018)
Achieved a 1st class hons. in Media Production where I specialized in video editing and learned to use tools like Adobe Premiere, AVID, Final Cut X, Sony Vegas.

Languages

English	Fluent
Portuguese	Fluent
Japanese	Conversational (JLPT N4)
Spanish	Conversational

Experience

LeWagon Teacher Assistant (2022 - present (part-time))
After graduating from the Lewagon course, I was invited back to help out the new batch of students. This gave me a chance to keep learning through teaching.

English Teacher (2019 - 2021)
Worked at two English schools, KidsDuo and Kogahkusha. My 1 year at KidsDuo involved managing classes of 30+ students at times and also became in charge of scheduling staff. At Kogahkusha (2yrs), was a more concise environment with classes of 4/5 students. I became in charge of giving private programming lessons to students using Sony's KOOV platform.

During my time teaching I gained many soft skills communication, organization, time management, planning , accountability and most importantly, patience when something goes wrong. I believe many, if not all of those skills are the backbone of a great programer.

Web Projects *(more projects on website)*

Spotify Clone 🟢
renato-spotify-clone.herokuapp
A simple Spotify clone app allowing user to play music on the app. Using Spotify's API that's supposed to get user's real info and playlists. Made using React.

Disney Clone
disney-clone-renato.herokuapp
A Disney clone interactive website. Made using the React framework and firebase. Made using React.

Rock, Paper, Scissors ✌
Can you beat my AI?
